

2004 Leopard Exhibit

Special thank you to Tom and Ann Marie for donating monies for the materials and their time to construct a larger leopard enclosure in 2004. This enclosure has a "pond" and a "tree". The two leopards that live in this area cool off in their tub on the extremely hot summer days. After taking a dip, they leap up to their 15 foot high platform to survey their "jungle".

Top left: TJ working on the platforms in the tower. Top right: Almost the entire enclosure. Bottom left: Baggie investigating his new enclosure. Bottom right: Tendwa taking a rest.
