

2013 Macaw Aviary

Another project is for the birds... the macaws, that is. T&D's currently houses 11 blue & gold, 2 scarlet, and one green-winged macaw that will be moving to an aviary of their own! The outdoor area is 24x24x12. They also have an indoor area that will be their housing area for the winter (these birds need heat during Pennsylvania winters).
